- Content and Audience
    - They understood my purpose and audience
    - Add some images and maybe a feature or two
- Design and User experience
    - They said the design was simple and easy to follow
    - It needed to look more engaging; needs more in it
- Functionality and performance
    - Everything worked as it should
    - Nothing seemed to be especially slow loading
- Accessibility and usability
    - Navigation and contrast were fine
    - Need to give form elements names so disabled access is easier
- Action plan
    - They saw my vision and liked my creative direction, things just need to be fleshed out
    - I will add more images and features to make it more dynamic and interesting
