

PART 2

A: Define Your Product

1. The product addresses the lack of business and promotion for local events, venues, and artists
2. The product is an app that finds local events, venues, and artists, and promotes them
3. I am building a brochure/advertisement website
4. Our product helps small businesses and local artists find a wider audience and attract more people. This matters because in this digital age, with everything being online, real-life community has almost become a thing of the past. Art and music do wonders to bring people together and build communities, and our goal is to encourage that.

B: Target Audience

1.
 - Demographics:
 - Anywhere between 13-65 years old
 - Pretty even distribution, maybe leaning towards men slightly
 - United States
 - Both
 - Socioeconomic details:
 - Between 20K and 50K a year
 - Between high school diploma and college degree
 - More single than married
 - Could be anything
 - Between 10 and 40
 - Web Behavior:
 - At least three times a day, more most of the time
 - Either a computer or a phone

2.

Jake

- a. 20 y/o
- b. Male
- c. Kingston, RI
- d. College student
- e. \$10k /year
- f. Frequent web use

Kyle

- g. 22 y/o
- h. Male
- i. Newport, RI
- j. Rapper
- k. \$14k /year
- l. Very frequent web use

- r. Moderate web use

3.

- Jake is looking to get into his local alternative music scene
- Kyle is looking for venues to perform in
- Katy is looking to promote her venue and attract more customers and local talent

PART 3

A: Website requirements

1. Purpose and goals

- The primary goal of the website is to sell our product
- Purchase/download

2. Content and features

- What our product does, why our product matters, product demo, FAQs, reviews
- The homepage will have real-life pictures and highlight a sense of community. Text along the lines of “Find your scene” or “A new community is just a few clicks away”

3. Look and feel

- Gummicube.com - vibrant colors, simple layout
- Start.io - Simple design, use of pictures

B: Design and prototyping

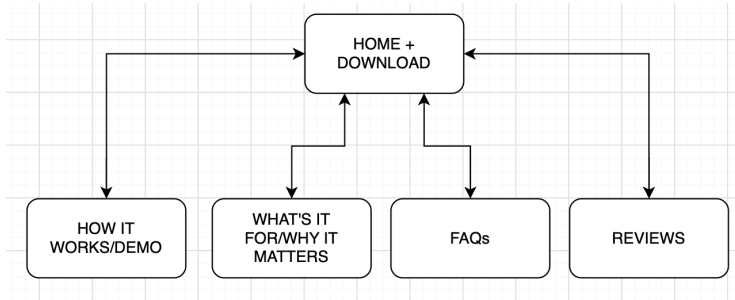

1. Approach and timeline

- Waterfall
- Page design - homepage - internal links/navigation - pictures/colors - final touches

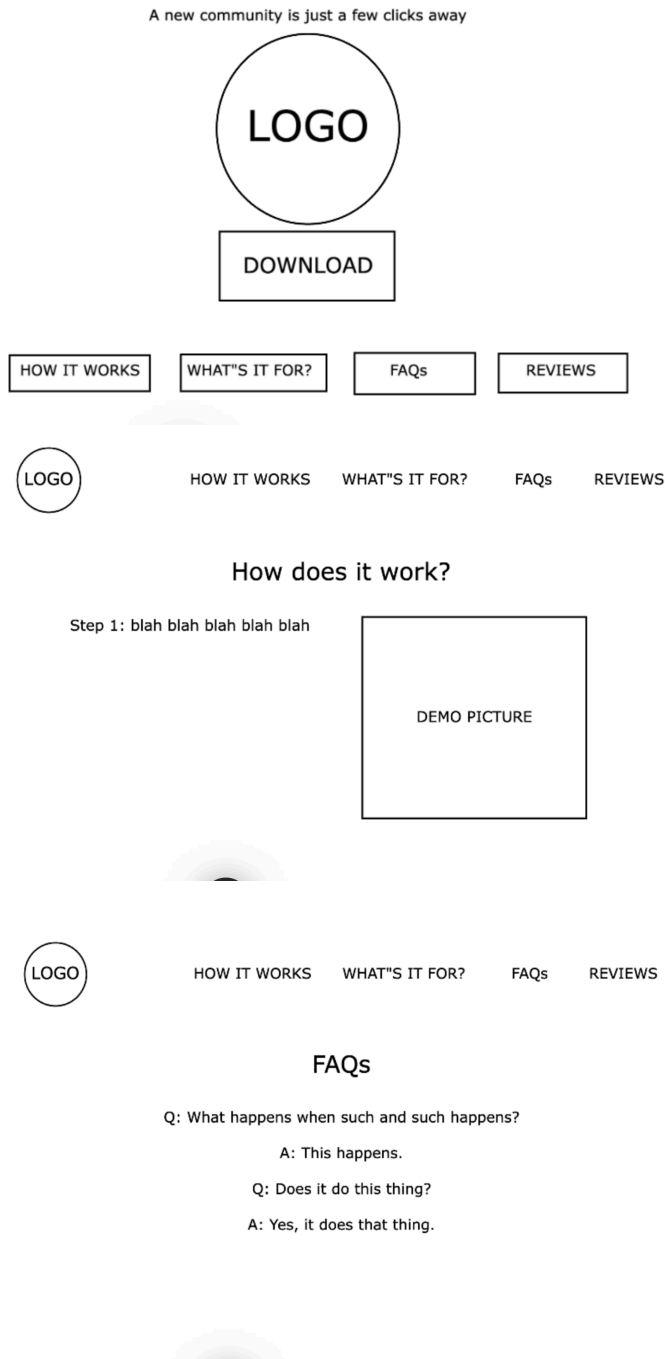

2.

3.

4.

5. Accessibility:

- For the deaf: everything is clearly labeled, audio is not really a component
- For the blind: audio readout of each page, each button has audio description when tabbed to
- For motor function: tab key can take you through the website
- I'll use diagnosis.css to audit my site
